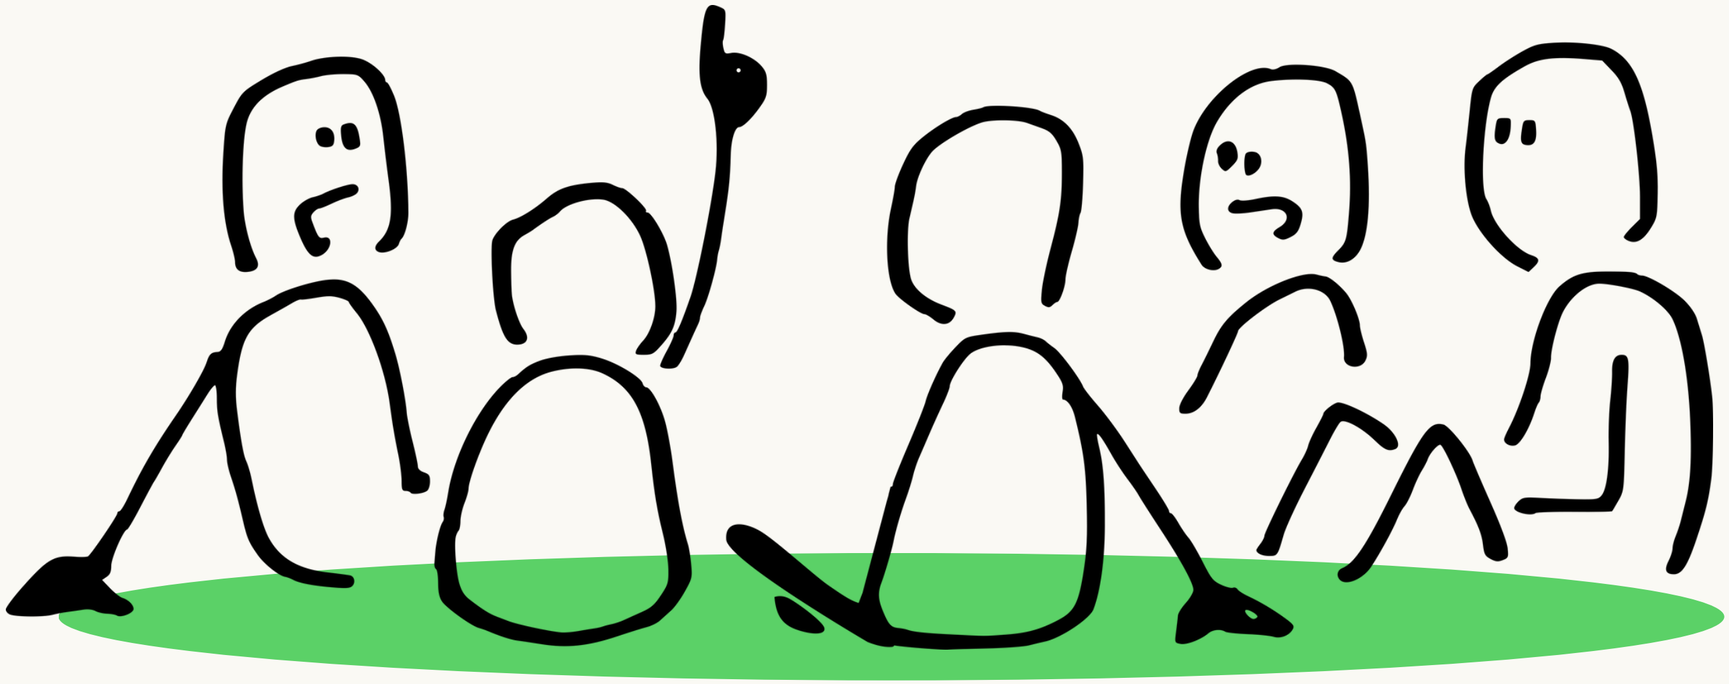
NOVI

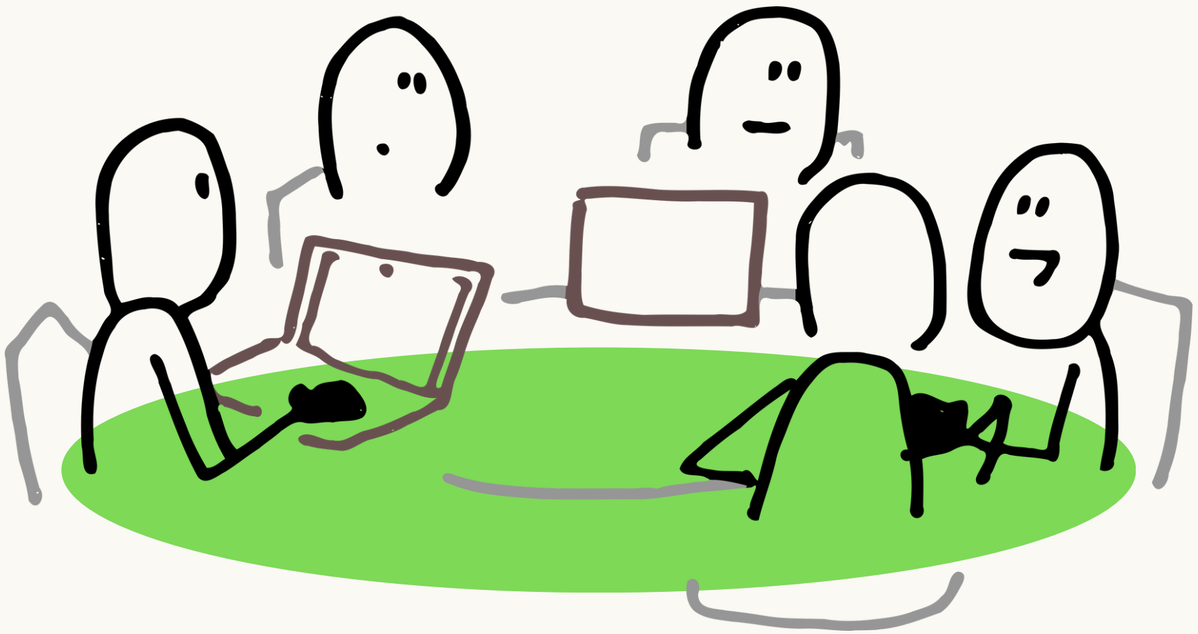
On-chain payments--but
ridiculously simple

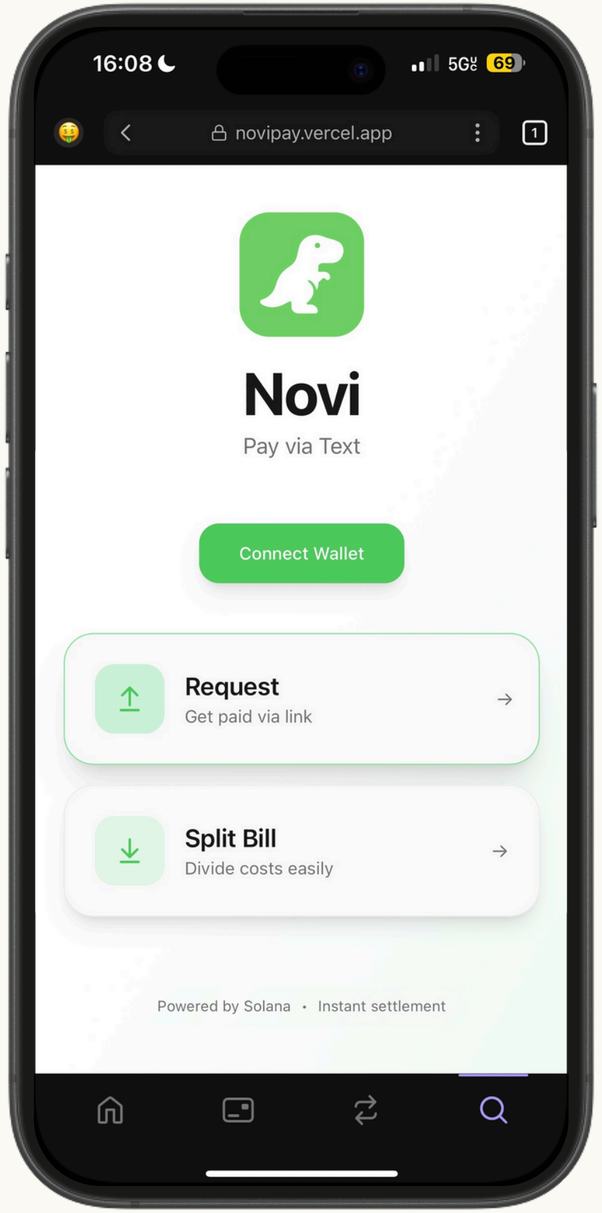


Paying with crypto is too hard

Users shouldn’t need **long wallet addresses** to pay others

Nobody wants to see:
‘*EPjFWdd5AufqSSqeM2qN1xzybapC8G4wEGGkZwyTDt1v*’





Pay with Novi

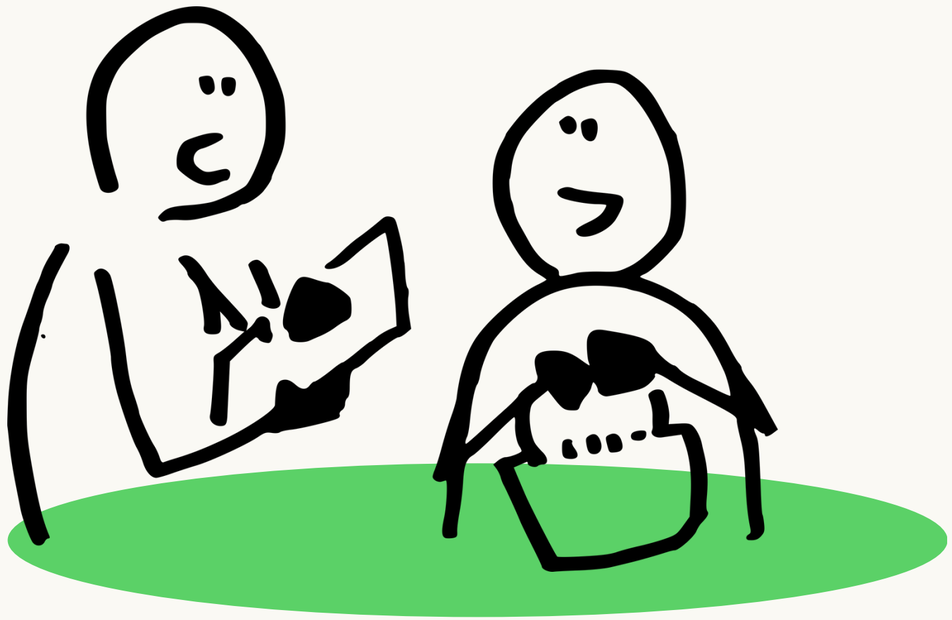
1) Create a link in **<5 seconds**

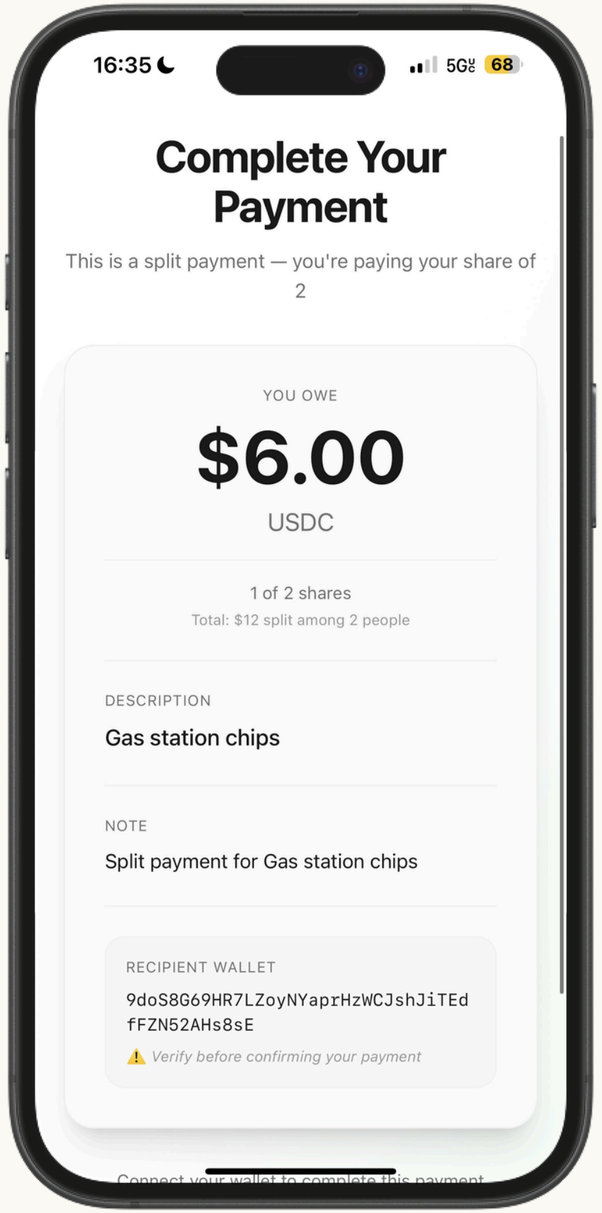
2) Share via text, telegram... even email!

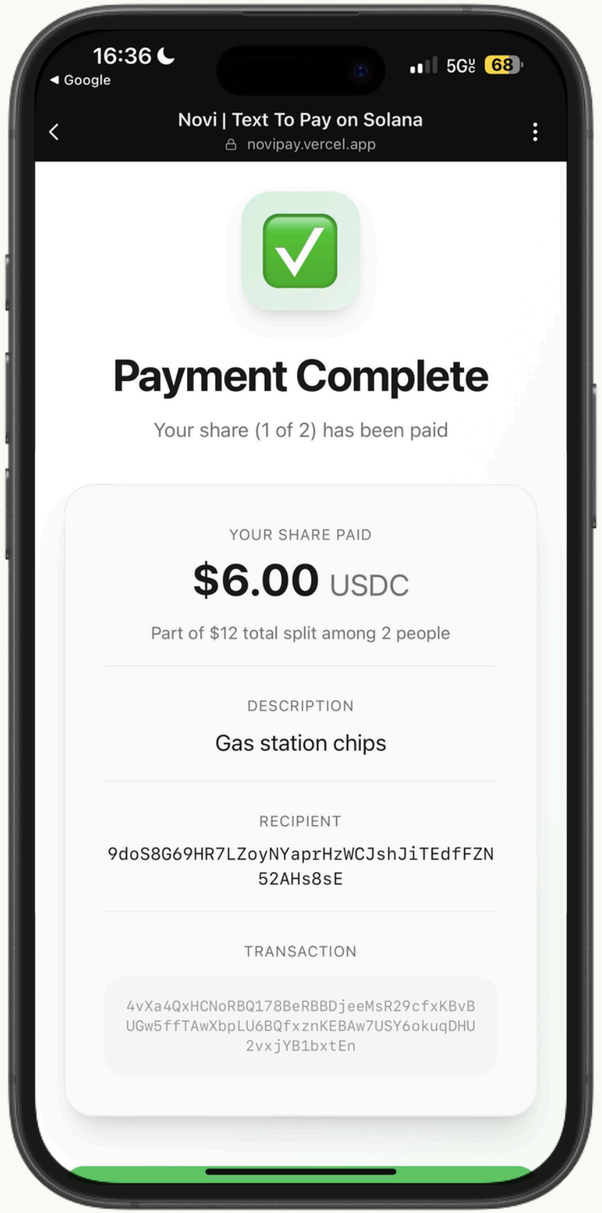
3) Recipient confirms and pays the sender
(No wallet addresses needed!)

Like Venmo requests, but on Solana

What recipients see



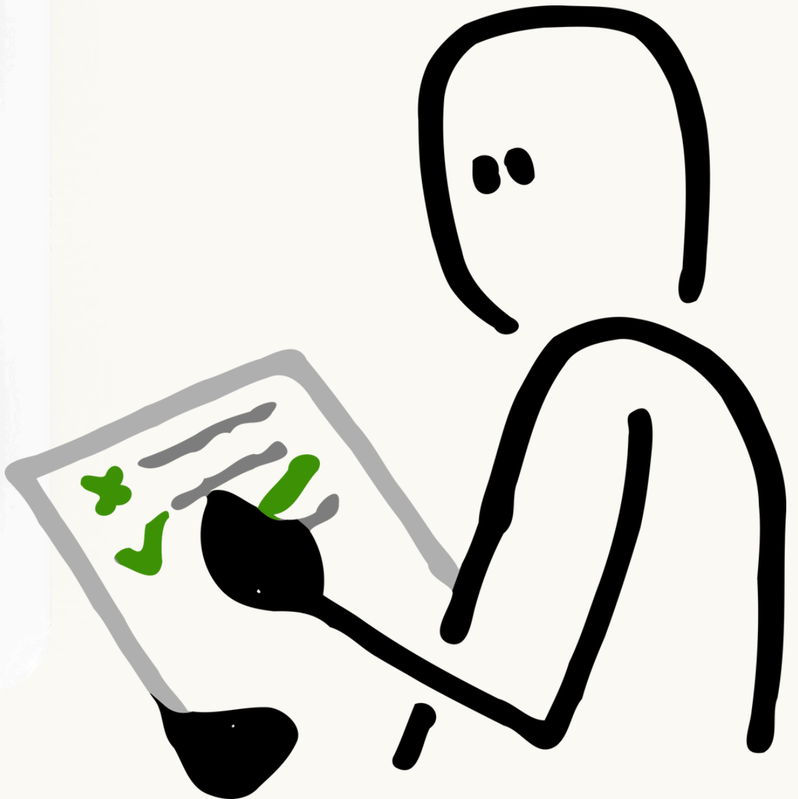




Novi is for Bill Splitting 9:43 AM
Kyle requested $10 USDC for burritos

And for invoices 9:41 AM
Jenny requested $35 USDC for mowing

And everything in between 9:28 AM
Taylor requested $4.20 USDC for letting you share the Netflix account



Novi handles everything on-chain

no centralization no problem

Try Novi today

the easiest way to split
a check on Solana
